IMPROVE YOUR CARGO MANAGEMENT WITH VERISTAR DANGEROUS GOODS AND BULK

Mitigating the risks associated with the transport of dangerous goods is one of the major objectives addressed by IMO. As a result, SOLAS and IMSBC Code require the application of strict and complex safety regulations to protect the ship and crew from hazards due to the carriage of this kind of cargo.

Veristar Dangerous Goods and Bulk helps you achieve compliance while optimizing your cargo transportation.

FAST ASSESSMENT

- Automatic generation of lists of transportable goods
- Customized checklist of items to be verified on board to optimize Bureau Veritas surveys
- Continually updated with new SOLAS and IMSBC Code amendments

EASY TO ACCESS

Access VDGB anywhere, anytime to consult information or simulate events or modifications

REAL-TIME INFORMATION

- Updated with Bureau Veritas survey findings
- Synchronized with other Bureau Veritas tools to keep ship information up to date

IMPROVES UNDERSTANDING

- Fast answers to questions on the transportability of a class or product
- Complete ship database with a full inventory of equipment and arrangement and access to historic information
- Information on why goods cannot be transported

SIMULATES FUTURE EVENTS

- Assess the impact of new regulations
- Analyze the impact of a modification to equipment or ship arrangement
- Simulate a new project

SIMPLE TO USE

Takes the complexity out of SOLAS and IMSBC Code compliance thanks to automatic generation of lists and documents for shipment
