### Course Information Sheet

Course Title	<b>Certified PHA-HAZOP Leader Course</b>
Instructor	BV approved instructor
Course Duration	5 Days
<b>Course Objective</b>	<p>The main objective of PHA-HAZOP Leadership training program is to create a global network of PHA-HAZOP Leaders and specialists with a shared understanding of PHA and HAZOP concepts in accordance with IEC 61882.</p> <p>By the end of this training course, participants will be capable:</p> <ul style="list-style-type: none"> <li>• To develop a grasp of Process Hazards Analysis (PHA) ideas and their function in managing health, safety, and the environment.</li> <li>• To give a fundamental understanding of all the MAH identification methods and the appropriate times to utilize them.</li> <li>• To help people comprehend the duties associated with PHA leadership.</li> <li>• To teach fundamental abilities and practice using the What-If and HAZOP procedures.</li> </ul>
<b>Who should Attend</b>	<p>For people working in management, engineering (design, process, chemical, facilities, instrumentation and controls), operations, and process safety, this course offers a review of the major PHA and HAZOP Study issues and elements. The practical methodology taught in this course will be helpful to engineers, safety/environment staff, plant operators, area managers, and maintenance staff.</p>
<b>Outline(should be day wise)</b>	<p><b><u>Day 1:</u></b></p> <ul style="list-style-type: none"> <li>▪ Risk Concepts             <ul style="list-style-type: none"> <li>○ Hazardous Event</li> <li>○ What is Risk?</li> <li>○ Typical Incidents that Concern Us</li> <li>○ Industrial Incidents of Major Significance</li> </ul> </li> <li>▪ Regulatory Developments</li> <li>▪ Risk Terminology</li> <li>▪ Process Hazards and Risk Management Alternatives             <ul style="list-style-type: none"> <li>○ Hazards that Concern Us</li> <li>○ What Increases the Potential for Industrial Facilities to Become More Hazardous?</li> <li>○ What Makes Transportation of Dangerous Goods More Hazardous?</li> <li>○ How are Process Risks Analyzed?</li> <li>○ Principle and Practice of Risk Analysis via Quantitative Risk Assessment</li> </ul> </li> <li>▪ Introduction / Overview of PHA</li> <li>▪ History of PHA</li> <li>▪ PHA tools for Identification of hazards</li> <li>▪ Choosing a PHA Methodology</li> </ul>

- Group Discussion / Exercises

**Day 2 :**

- Basics of HAZOP
  - What did we do before HAZOP Came Along?
  - How Do We Know If a Plant is Safe?
  - HAZOP Methodology
  - Methodology of Generating Deviations
  - What Type of HAZOP Should You Use?
  - Steps in the HAZOP Process
  - Variations in HAZOP Types
  - Preparation of HAZOP Reports
- Pitfalls with HAZOP, Optimization of PHAs & Sizing of Nodes
  - Pitfalls with HAZOP
  - Optimization: When to Do What
  - Choosing & Sizing of Nodes for HAZOP
- Group HAZOP Exercises

**Day 3 :**

- Preliminary Hazard Analysis
  - How and When to use PrHA
  - PrHA Procedure
  - Time Requirements
  - Advantages of PrHA
  - Limitations of PrHA
- What If/Checklist
  - When and How to Use What If Methodology
  - Steps in the What If Procedure
  - Time Requirements
  - Advantages of What If Analysis
  - Limitations of What If Analysis
- Checklist
  - When and How to Use Checklist Methodology
  - Steps in the Checklist Procedure
  - Time Requirements
  - Advantages of Checklist Analysis
  - Limitations of Checklist Analysis
- Failure Mode and Effects Analysis (FMEA)
  - What is FMEA?
  - When and How to Use FMEA
  - Steps in an FMEA Study
  - Advantages of FMEA
  - Limitations of FMEA
- Group Discussion / Exercises

VERITAS**

	<p><b><u>Day 4:</u></b></p> <ul style="list-style-type: none"> <li>▪ PHA-HAZOP Team Leadership <ul style="list-style-type: none"> <li>○ Opposition of PHAs</li> <li>○ Driving Forces Behind PSM</li> <li>○ Role of PHA-HAZOP Leader (Facilitator)</li> <li>○ PHA-HAZOP Team</li> <li>○ Choice of PHA-HAZOP &amp; Factors in Determining Choice</li> <li>○ Manage Time Spent on PHAs - HAZOPs</li> <li>○ Preparation before PHA-HAZOP Sessions</li> <li>○ PHA Leadership Responsibility</li> <li>○ Analyze Your Performance as a PHA-HAZOP Leader</li> <li>○ Steps for Performing PHA-HAZOP</li> <li>○ Main Goal of the PHA: Recommendations &amp; Remedial Actions</li> <li>○ Auditing of PHAs</li> </ul> </li> <li>▪ Group Discussion / Exercises</li> </ul> <p><b><u>Day 5 :</u></b></p> <ul style="list-style-type: none"> <li>▪ PHA-Pro Software Demonstration</li> <li>▪ Final Exam</li> </ul>
<b>Course Related Standards</b>	NA
<b>Pre-Requisites</b>	<ol style="list-style-type: none"> <li>I. Experience in process operation</li> <li>II. Ability to read and understand engineering drawings</li> <li>III. Basic computer skills</li> <li>IV. Ability to communicate in English (both oral and written)</li> <li>V. Effective writing skills</li> <li>VI. Strong interpersonal and leadership skills</li> </ol>
<b>Training Methodology</b>	<ul style="list-style-type: none"> <li>○ Group Exercises (2 or more)</li> <li>○ Project work</li> <li>○ Role Play</li> <li>○ Simulation (if any)</li> <li>○ Case Studies</li> <li>○ Individual Exercises</li> </ul>
<b>Course Assessment</b>	<ul style="list-style-type: none"> <li>● Daily Group Exercises</li> <li>● Final Exam</li> </ul>
<b>Deliverables:</b>	Bureau Veritas certified Certificates will be issued to all the attendees.
