

Management and Leadership

Assisting managers at all levels to review suggested best practices from the industry, adopt them to alleviate their workload and improve their Leadership skills.

AIM OF THE COURSE

This course aims to provide skills and tools for managers at all levels to consider them for improving their managerial efficiency and increase their Leadership potential through the usage of case studies and role – play sessions.

COURSE LEARNING OBJECTIVES

Upon completion, successful participants will be able to:

- Distinguish each phase of the managerial cycle and act accordingly
- Feel safe with the usage of Key Performance Indicators
- Assess the responsibility and authority levels for the task at hand and act accordingly
- Address all five elements of the managerial cycle and make appropriate decisions
- Apply industry best practices and proven methods to Lead with greater success
- Give orders in a clear and concise manner
- Check work delegation against the “Criteria of Difficulty”
- Assess the motivation or lack of it behind reluctance to undertake work
- Identify the Leadership level their “followers” see them at
- Decide on their future approach to improving their leadership position
- Identify gaps in the company’s fleet instruction manuals and propose improvements
- Write goals for future managerial improvements and monitor progress

Who would benefit?

Company personnel at lower, middle or senior management level. Ship officers of all ranks. The seminar is suitable also for personnel carrying out onboard inspections as it discusses responsibility and authority issues in depth.
